Mohsen Ghaemmaghami

Senior Software Engineer · Remote · hi@mohsengh.com · LinkedIn · GitHub

I build fast, clean, scalable web applications. 12+ years of frontend and full-stack work, from a 1-million-user ranking page in 2013 to module-federated React platforms today.

Experience

Senior Software Engineer · Lambda Curry 2025 – now · Full-time · Remote

- Building commerce platforms on Medusa with Node.js, Redis and TypeScript.

Medusa · Node.js · Redis · TypeScript

Senior Software Engineer · Bettermode 2024 – 2025 · Contract · Remote

- Designed and shipped real-time features over WebSocket for a community platform, in Node.js and TypeScript.

Node.js · TypeScript · WebSocket · Software design

Senior Frontend Developer · Oxolo 2023 – 2024 · Full-time · Germany · Remote

- Restructured the frontend with module federation and a pnpm + nx monorepo, with a unified type-safe contract between DB, backend and frontend: 35% less deployment complexity, 30% more developer efficiency, 90% fewer manual errors.
- Rewrote the main Editor app with React Query, Tailwind and an in-house Storybook design system: 40% smaller bundle, better error handling.
- Raised test coverage 25% with Playwright, and pushed the marketing site's Core Web Vitals above 90 across the board.
- Mentored new joiners (two became tech leads) and took part in hiring.
- Prototyped a gRPC/ConnectRPC contract between backend and frontend.

React · React Query · Tailwind · Storybook · Module federation · pnpm + nx · Playwright · gRPC

Senior Frontend Developer (Web3) · Web3 Bridge 2022 – 2023 · Contract · Hybrid

- Built a DeFi browser extension on ether.js and the Compound Finance SDK.
- Introduced TDD with Jest, React Testing Library and Storybook: 90% fewer bugs, faster releases.
- Rewrote the legacy product in Next.js, Tailwind and HeadlessUI: 25% faster loads.

ether.js · Compound SDK · Next.js · Tailwind · HeadlessUI · Jest · RTL · Storybook

Software Development Team Lead · Mootanroo 2018 – 2022 · Full-time · Tehran

- Led a team of 20 engineers; the marketplace product doubled sales by rethinking the user journeys.
- Doubled team velocity with a synchronized dev environment, 80%+ aligned with production.
- Architected the React + Redux + SSR frontend: 30% faster loads, TTFB ~130 ms, FCP 1.6 s, LCP 2 s.
- Shipped the iOS and Android apps with React Native.

React · Redux · SSR · React Native · Performance

Software Developer · Magic Mirror Art & Cultural Institute 2016 – 2017 · Contract · Remote

- Built an SEO-friendly site on WordPress with custom PHP landing pages.
- Kept the blog at ~0 downtime on nginx.

WordPress · PHP · nginx · SEO

Co-Founder · Amoozesh.it 2015 – 2016 · Startup · Tehran

- Produced a web-development course that reached thousands of learners on DVD (it was 2015; YouTube wasn't the classroom yet).
- Ran the site, landing pages and campaigns: +20% conversion, +40% engagement.

Teaching · Marketing · Web

Software Engineer · Farakav 2013 – 2018 · Full-time · Tehran

- Built and maintained Varzesh3.com's frontend, one of Iran's most visited sites.
- Real-time live scores over WebSocket with long-polling fallback: under 1 second from pitch to screen.
- Built Anten.ir's live video streaming platform with Vue, Vuex and HLS.js.
- Engineered the AngularJS admin panel, streamlining editorial workflows by 30%.

Vanilla JS · Vue · Vuex · HLS.js · WebSocket · AngularJS · ASP.NET MVC · Grunt

Web Developer → Website Manager · Jamdigital 2012 – 2014 · Full-time · Tehran

- Started as a PHP developer; grew into head admin and development lead.
- Built a game-player ranking platform for 1M+ users at 98% uptime, integrated with BMI.ir's customer club.

PHP · jQuery · MySQL

Skills

HTML5, CSS3, SASS, Tailwind CSS, responsive and accessible UI since 2012. ES2024+, performance profiling, bundling, the platform APIs. 12+ years. Strict TypeScript across frontend and Node, end-to-end typed contracts (gRPC/ConnectRPC). React since 2017: architecture, design systems, Storybook, performance, micro-frontends. Next.js app and pages routers, SSR/SSG, rewrites of legacy products. React Query, Redux, GraphQL, REST, gRPC/ConnectRPC. Node.js, WebSocket, Redis, Medusa, nginx, ASP.NET MVC and PHP in a past life. TDD/BDD with Jest, React Testing Library, Playwright, Cypress. Vite, Webpack, pnpm, nx, module federation, CI pipelines, Sentry. Code review, trunk-based development, release management, observability. React Native, ether.js, Compound SDK, browser extensions. Tech lead of 20 engineers, mentoring, hiring, architecture ownership. Persian (native), English (fluent), German (basic).

Education

- MEng, Artificial Intelligence, Payame Noor University (2016 –)
- BSc, Computer Software Engineering, Shamsipour Technical College (2013 – 2015)
- BS, Computer Engineering, Esfahan Technical College (Mohajer) (2010 – 2012)
